

Secure Partner Gateway Server

An ultra-secure alternative to the SFTP server deployed in DMZ, meeting regulatory compliances.

Salient Features

- ✓ Reduce server exposure by eliminating the need to create OS users
- ✓ Enforcement of Enterprise Specific Password Expiry Policy & IT Guidelines
- ✓ Whitelisting of user IP address (or range of IP addresses)
- ✓ Various highly secured modes for authentication - User ID/Password, LDAP, Certificate (key)
- ✓ Can be used on custom ports (other than port 22)
- ✓ Able to restrict time window for every user
- ✓ Read & Write access control
- ✓ Managed Secure Storage for individual user
- ✓ Data-Encryption-At-Rest
- ✓ Virtual directory for each user
- ✓ Centralized admin panel (GUI)
- ✓ User management & access control
- ✓ Virus check on recieved data
- ✓ Data Loss Prevention (DLP) - filtering of sensitive information
- ✓ Complete logging of all user activities in the database
- ✓ Real Time Dashboard
