

# Introducing AI Based Fault Early Warning System (FEWS)

## Unveiling Xfer4Sure's NxtGen Technology Marvel : Fault Early Warning System (FEWS)

Xfer4Sure, a trailblazer in Managed File Transfer Platforms, proudly introduces its latest innovation - Artificial Intelligence enabled Fault Early Warning System (FEWS). Designed exclusively for banks and financial institutions, FEWS, an add-on module of Xfer4Sure, real-time monitors all file transfers and uses machine learning algorithms to do proactive analysis to ensure timely, secure & reliable transfer of payment and other critical files over public network in H2H++, D2H, H2E and E2H configurations.

- ✓
Proactive Fault Identification
- ✓
Timely Notifications
- ✓
Historical Data Analysis
- ✓
Predictive Analytics for Data Transfers
- ✓
Load Forecasting
- ✓
Proactive Fault Management
- ✓
Machine Learning Algorithms

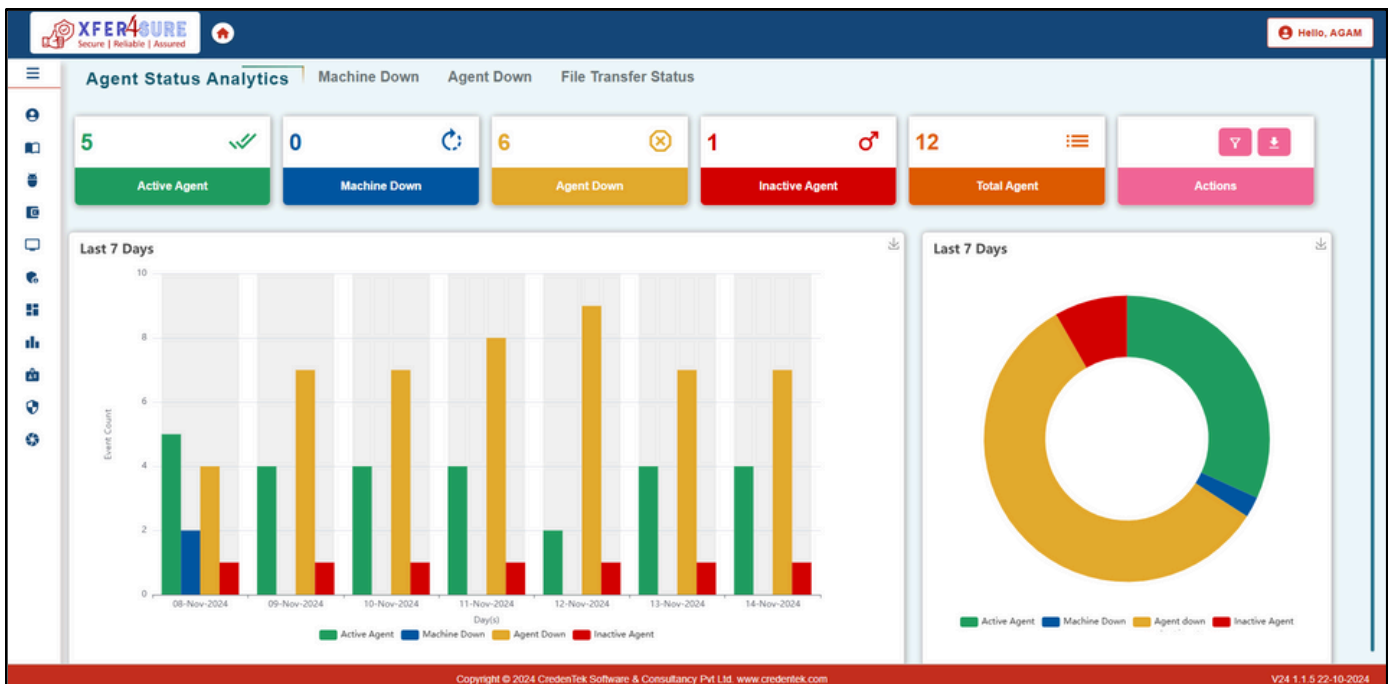

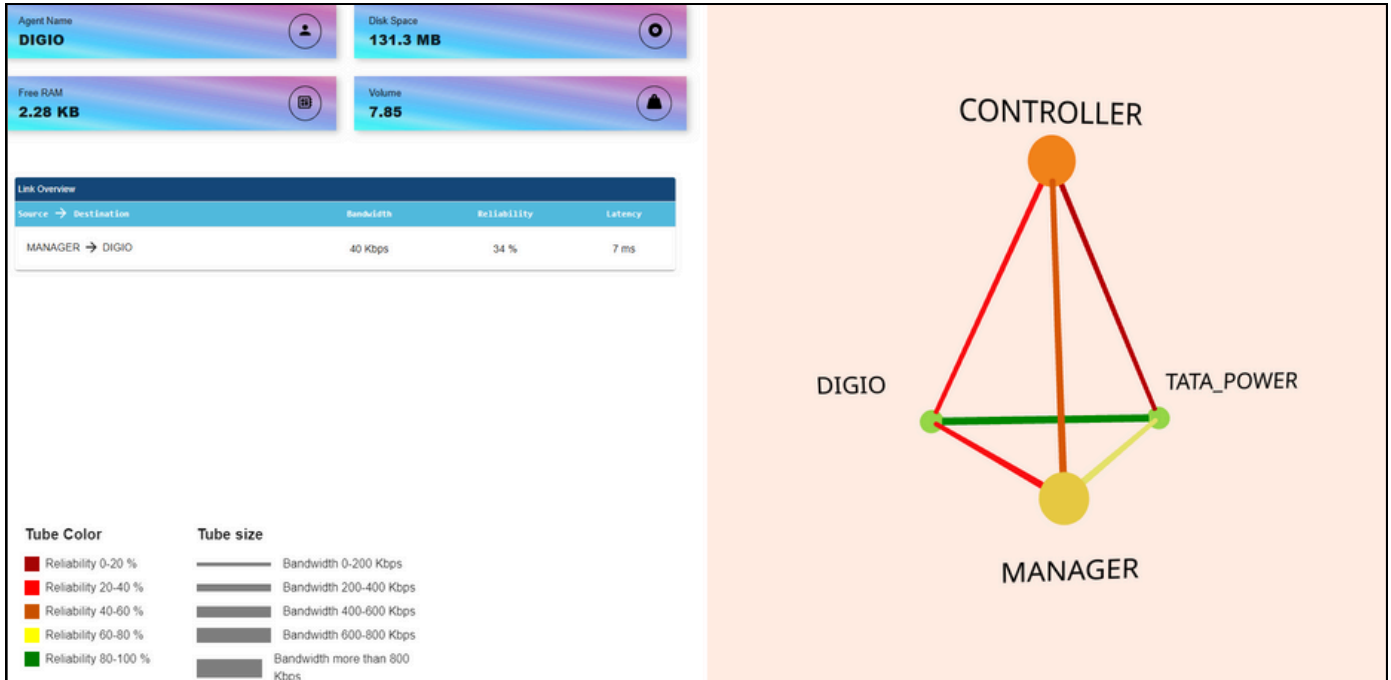

### List of Xfer4Sure's Modules

- H2H++
- D2H
- H2E
- API server
- E2H
- Mobile App
- Secure Partner Gateway

## New Feature - Prism Analysis

- Data Transfer By Volume Histogram
- Bandwidth Consumed Histogram
- Network Latency Pattern
- Reliability Index Champions
- CPU Utilization Pattern
- Free RAM Histogram
- Heavily Utilized Network Links
- Potential Network & Hardware bottleneck Predictions
