Introducing
H2H In A Box
Plug & Play hardware based H2H++ Solution

ULTRA FAST WAY TO OFFER H2H SOLUTION

Hardware & H2H Software bundled together

H2H in a Box is a pre-installed, pre-configured & pre-hardened hardware box with necessary H2H and other software, designed to enable instant H2H accesses. The hardware box data is fully encrypted and tested for maximum possible hardening configuration to allow only H2H services.

Benefits

✅ **Secure Access Hardware Device**
- Pre-burn hardware box with necessary pre - configured software to enable quick onboarding of H2H customer. This box serves as a secure gateway to seamless data transfers.

✅ **Secure User Management**
- Management Console for User Management and access control. Only authorized users can securely access Xfer4Sure H2H services.

✅ **Robust Tamper Protection**
- Rest assured with built-in tamper protection, safeguarding the hardware device and maintaining data integrity.

Software
- Management Console
- SFTP Server
- Xfer4Sure Bot
- License Files

CredenTek

Salient Features

✅ **Device Base H2H Setup**
- H2H software is tightly integrated with hardware device ensuring that the complete setup is 100% secure and reliable. Periodic auto-purge of sensitive data ensures that risk is mitigated.

✅ **Pre-Installed H2H software**
- Enjoy hassle-free usage with pre-installed agents, simplifying the process for immediate use.

✅ **Secure SFTP/API File Transfer**
- Experience secure file upload and download through SFTP/API, ensuring data integrity and confidentiality.

✅ **Seamless Integration with ERP Applications**
- Connect ERP applications easily, allowing files to be stored and accessed via SFTP/API locations for streamlined operations.
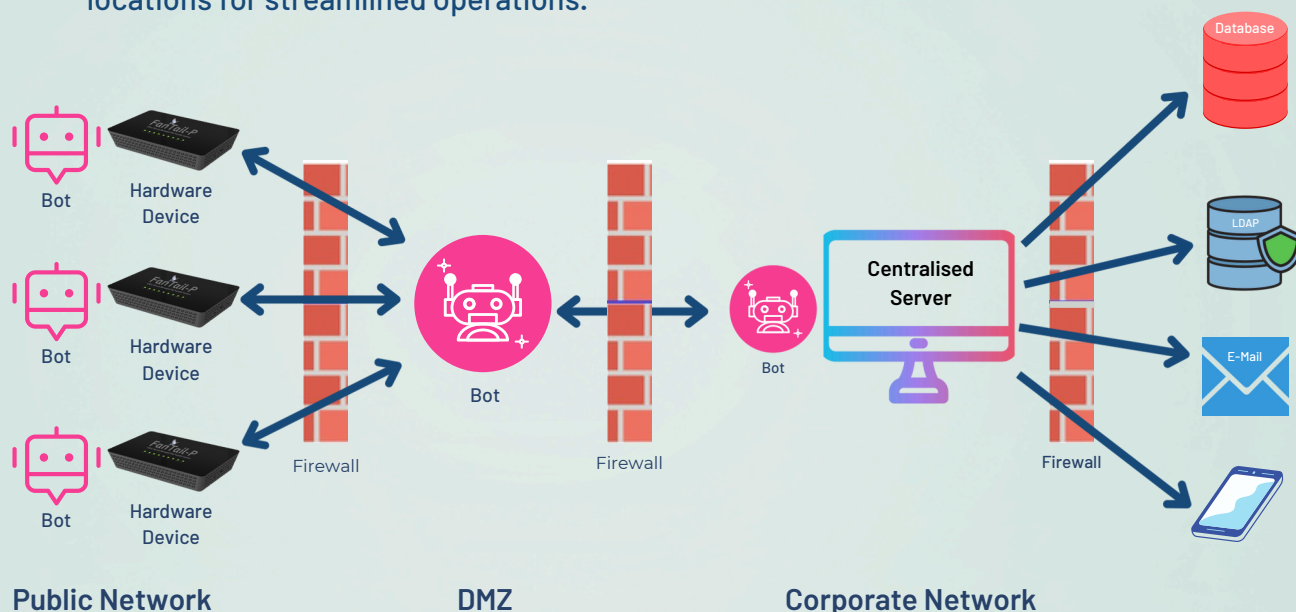

Xfer4Sure® - by **CredenTek** is a cutting-edge software application since 2012 that ensures secure data transfer across networks, adhering to RBI guidelines for encryption compliance.

With auto-switchover, seamless failover, and a comprehensive audit trail, it offers monitoring through an interactive dashboard, timely notifications, and early alarms.

It also supports file encryption, access control, and LDAP integration, guaranteeing reliable and scalable data transmission.
