

# Introducing H2H Secure+

## Xfer4Sure's PKCS #11 Based Enhanced Security

## SECURE YOUR H2H DATA FILES DIGITALLY

H2H Secure+ is an advanced module for Xfer4Sure, providing additional security through PKCS #11 technology. With simple activation, centralized license management, and exclusive non-transferable keys, it offers a secure and efficient data transfer experience, ensuring unmatched data protection and peace of mind for users.

### Enhanced Security

Fortify your Xfer4Sure experience with H2H Secure+, offering unmatched add-on security via PKCS #11 solution

### Easy and Secure Installation

Activate the module effortlessly with a one-time activation code, ensuring a robust setup process

### Cryptographic Hardware Integration

The integration of PKCS #11 enables seamless integration with cryptographic hardware devices like smart cards and HSMs, ensuring enhanced security for H2H Secure+

## Features & Benefits

### Secure Key Storage

- PKCS #11 facilitates secure storage of private keys and certificates in cryptographic tokens, aligning with the secure dongle-based protection offered by H2H Secure+

### Standardized API

- The standardized PKCS #11 API ensures easy integration and compatibility with various cryptographic hardware devices, simplifying the implementation of H2H Secure+ for enhanced security

### Hardware Security Assurance

- Leveraging PKCS #11's support for HSMs, H2H Secure+ offers robust hardware-based protection and peace of mind against potential security breaches

### Enhanced Cryptographic Operations

- PKCS #11 empowers H2H Secure+ with advanced cryptographic capabilities, enabling secure encryption, decryption, digital signatures, and key management

### Industry Proven

- With its long-standing reputation and use in numerous security applications, PKCS #11 reinforces the credibility of H2H Secure+ as a reliable and trusted security solution

### Efficient License Key Management

- Seamlessly handle license keys for multiple hardwares through our centralized management system

### Your Exclusive Access

- Embrace an individualized experience with a non-transferable activation key for each H2H Secure+

Xfer4Sure® - by CredenTek is a cutting-edge software application since 2012 that ensures secure data transfer across networks, adhering to Central Bank's guidelines for encryption compliance.

With auto-switchover, seamless failover, and a comprehensive audit trail, it offers monitoring through an interactive dashboard, timely notifications, and early alarms.

It also supports file encryption, access control, and LDAP integration, guaranteeing reliable and scalable data transmission.
